

## Zirconia Implants: A Viable Aspect In Dental Implantology

*The Long Term Success of Zirconia Dental Implants: Twenty Five Years of Surgical and Restorative Experience.*

### SPEAKER BIOS:

**DR. BOBBIE BECKMAN** graduated from the University of Stockholm, Karolinska Institutet. He has since then dedicated most of his time and practice to metal free dentistry and the last twenty five years to ceramic implantology. Dr. Beckman is a pioneer in metal free implantology and has been placing zirconia ceramic implants since 1999. His vast experience spans over four different ceramic implant systems with success rates comparable to that of titanium and titanium alloy implants. Dr. Beckman is a lecturer and an author, he has lectured across Europe and the United States on metal free dentistry and ceramic implantology. In 2003 he was instrumental in launching the first Biological Dentistry Congress in Italy.

**DR. SAMMY NOUBISSI** graduated from Howard University College of Dentistry. He attended Loma Linda University's three-year formal training in Implant Dentistry. There he earned a certificate and a Master of Science degree in dental Implantology. An author and researcher Dr. Noubissi is a member of the editorial board of the Journal of Implant and Advanced Clinical Dentistry, a reviewer for the Journal of Oral Implantology and the founding president of the International Academy of Ceramic Implantology (IAOCI). He lectures extensively nationally and internationally on topics relating to the multiple applications of ceramic dental implants in oral rehabilitation. Dr Noubissi practices in Silver Spring, Maryland.

### COURSE OVERVIEW:

This course will provide a historical perspective of both prosthetic and surgical aspects of zirconia dental implants as well as the evolution of ceramic implantology across various implant systems. Decision trees will be presented when it comes to choosing zirconia versus metal implants for your patients. Drs. Beckman and Noubissi will share their collective clinical and scientific experience as well as science based outcomes from their individual practices and multicenter studies. Long term clinical findings and observations will be presented comparatively for different zirconia implant designs and configurations.

### LEARNING OBJECTIVES:

This course will enable you to:

- Have a deep knowledge of zirconia as an implant material.
- Recognize indications for successful metal free teeth replacement.
- Site preparation and/or preservation for optimal prosthetic results.
- Utilize CBCT and virtual implant planning software to increase case success.
- Appropriate selection of permanent restorative materials.
- Identify and manage complications.

DATE: November 7 and 8, 2013

LOCATION: 801 Wayne Ave, Suite G200  
Silver Spring, MD 20910

SPEAKERS: Bobbie Beckman, DDS and  
Sammy Noubissi, DDS, MS

**MILES of SMILES INSTITUTE**  
ADVANCE DENTAL IMPLANT EDUCATION

Miles of Smiles Institute is an Academy of General Dentistry Approved PACE Program Provider FAGD/MAGD Credit. Approval does not imply acceptance by a state or provincial board of dentistry or AGD endorsement. 5/1/13 to 4/30/15 Provider #352916
